## Enrolment conditions and criteria in case of limited enrolment

Candidates can enrol into the masters degree study programme Graphic and interactive communications if they have finished:

a) at least 1<sup>st</sup> level study programme evaluated with minimum 180 ECTS credit points from the professional fields of natural sciences, engineering, technology, computer and information science, media, economics, design, audio-visual technology and multimedia production, or an equivalent study programme completed under current regulations in the Republic of Slovenia or abroad;

b) at least 1<sup>st</sup> level study programme evaluated with minimum 180 ECTS credit points from other professional fields, or an equivalent study programme completed under current regulations in the Republic of Slovenia or abroad if the candidates have completed prior to the enrolment all study obligations essential for continuing studies. These obligations are determined by the Study commission of the Faculty of natural sciences and engineering and comprise from 10 to up to 60 ECTS credit points.

### In case of limited enrolment,

the candidates referred to in point (a) shall be short-listed on the basis of the number of points obtained in the 1<sup>st</sup> level study programme or in a higher education or university study programme prior to the introduction of the Bologna declaration;

the candidates referred to in point b) shall be short-listed according to:

- the number of points achieved in the 1<sup>st</sup> level study programme (75% of points), and
- the number of points achieved in performing additional study obligations (25% of points).

Points are calculated by multiplying the average grade of studies or additional study obligations from point b) to one decimal place by 10 (maximum 100 points).

## Requirements for advancing through the study programme

To enrol into the second study year, students must have collected at least 54 ECTS credit points.

Exceptionally, the Study commission of the Faculty of natural sciences and engineering may approve transition to the second year for a student who has achieved at least 42 ECTS credits in the first year if they have a justifiable reason. Justifiable reasons are stated in the Statute of the University of Ljubljana.

To repeat the first study year, students must have achieved at least 28 ECTS credit points.

A student may repeat the year once or change the study programme once during the course of their studies due to non-fulfilment of obligations in the previous study programme.

In case of limited enrolment, the candidates will be short-listed based on the average grade of their studies up to that point.

 On the proposal of the Study commission of the Faculty of natural sciences and engineering, the Senate of the faculty decides on the basis of an individual application of the student and proof of performed obligations whether the student meets the requirements for the transfer and recognition of obligations.
