

Transfer between programmes

[NTF](#) › [IGT](#) › [Study](#) › [Bachelor's degree](#) › [Graphic and Interactive Communication \(UN\)](#) › [Other information](#) › [Transfer between programmes](#)

Transition is possible between two study programmes:

• **Destination:** that ensure upon the completion of studies the acquisition of comparable competences or learning outcomes;

- here, in line with the criteria for recognition of knowledge and skills acquired prior to the enrolment into the
- university study programme Graphic and interactive communications, at least half of the obligations
- according to the European credit transfer system (ECTS) can be recognised from the first study programme,
- referring to compulsory courses of the 1st level university study programme Graphic and interactive
- communications.

• **At least one individual exam** passed in the original study programme is recognised as passed in the 1st level university study programme Graphic and interactive communications if the harmonisation of the contents of both courses amounts to at least 75%. The recognised exam is evaluated with credit points in the original study programme; however, not with more credit points as evaluated in the 1st level university study programme Graphic and interactive communications.

• **A candidate can enrol through transfer into the second or third year of the university study programme Graphic and interactive communications if:**

- they meet the conditions for enrolment into the study programme,
- vacant places are available.

The Study commission of the Faculty of natural sciences and engineering determines for each candidate to what extent it recognises their already completed study obligations, determines the obligations and which year the candidate can enrol into.
