

Welcome Spring

[NTF](#) > [IGT](#) > [Welcome Spring](#)

Welcome Spring is an exhibition of hand-made and machine-finished paper products made from primary and secondary cellulose fibers. The exhibition presents an inspiration of new content, in a more unique and peculiar way, where handicrafts and modern technologies intertwine. The produced papers were hand-shaped on sieves made of invasive alien plants (staghorn sumac) and printed on UV InkJet or laser engraved graphics.

- The exhibition was created within the framework of other forms of work in the subject Graphic finishing (optional subject), at the study program GIK3 in the academic year 2021/2022.
- Mentor and author of the exhibition: doc. dr. Klemen Možina
- Technical assistance: Jana Rozman and Alenka More
- Students: Jernej Debevc, Ana Kušar, Klara Močeničnik, Nika Poljanšek, Veronika Pustoslemšek and Laura Robek
