Last week, 12 partners of the **#RECENTRE** project came together in Ljubljana to advance the green transition in the Alpine manufacturing sector. Led by **University of Ljubljana** and the **Technology Park Ljubljana**, we're driving sustainable innovation through pilot projects and advanced technologies.

Beyond productive discussions, we also explored the city 🏙️, strengthened partnerships 🤝, and visited cutting-edge university labs. This is just the beginning—stay tuned for more impact! 🌱
