## Central specialised information center for natural sciences (OSICN)

The central specialised research centres ([OSIC](#)) were established for all scientific disciplines on the basis of a public tender of [Slovenia Research Agency](#).

The CSICs process, store and communicate specialised information to all users in their respective scientific fields. They also monitor and supervise the compliance bibliographic units classification with the **valid typology of documents/works for bibliography handling in the [COBISS system](#)**.

The categorisation of scientific publications uses Slovenian Research Agency (ARRS) methodology implemented in the [SICRIS](#) (Slovenian Current Research Information System). Institute of Information Science Maribor [IZUM](#) coordinates the work of CSICs.

### Head of OSICN:

Irena Sajovic, MSc

Tel. 01/20 03 254
