– **Magdalena Georgievska, from Faculty of Technology and Metallurgy, UKIM, Skopje**

“The whole experience was amazing, I recommend Ljubljana and NTF to anyone who wants to go on an exchange, it is such a friendly place for students! About studying at NTF I would say that I was surprised about the effort professors made to teach us in English, widen our knowledge and care that we have comfort and a good time during the stay. The library offers a wide range of books about almost everything connected to fashion, textiles, art and graphic design, and is very comfortable and nice place to study. The faculty has really good equipment and offers a great practice, so maybe in the future it is good to have even more practical lectures for Erasmus students.

The stay here helped me expand my knowledge, my understanding of the field I study, my English vocabulary for technical and textile terms. I learned a lot and got a good direction about my future development, made friends with many international students and improved my level of confidence. All in all, there are not words to describe how wonderful the experience was and how thankful to the faculty I am for that!”
