Issue 3 | February 2018

Call for Tenders

The Marine-EO Request for Tenders invites all interested parties to present their offers to bridging innovative downstream earth observation and Copernicus enabled services for integrated maritime environment, surveillance and security.

This procurement is a pre-commercial procurement (PCP).

The total budget for the PCP is 2.769.106€ (VAT excluded)

[cid:image002.jpg@01D3AA5C.E9975AC0]<<https://facebook.us14.list-manage.com/track/click?u=0433bbeb926ceaa614dbe98b0&id=273555851c&e=b246cc62eb>>

The challenge

The aim of Marine-EO procurement is to develop, test and validate a bundle of innovative EO downstream services bringing incremental or radical innovations in the field of maritime awareness leveraging on the existing Copernicus Services (i.e. CMEMS, Security) and other products from the Copernicus portfolio. In addition, a series of “support” services will standardize the way that EO (Earth Observation) is used for maritime awareness with regards to operational, technological, semantic and legal interoperability issues. The Marine-EO procurement seeks to cover the sea-basins of Mediterranean, Atlantic, and Arctic, by adapting Copernicus data and information in order to meet the demand of the buyers group.

The innovative EO downstream services are divided in two thematic areas that contractors can submit their offers on:

Thematic Area 1 SATOCEAN:
Copernicus Marine Environment Monitoring and Climate Change

The expected outcome under SATOCEAN is to provide three (3) downstream feature services:

1. Marine environmental status in hot spots (AOIs e.g. Gulfs, MPAs etc.).
2. Detection of Fish farms threats.
3. Detection of vessels and icebergs in Arctic areas.

[cid:image003.jpg@01D3AA5C.E9975AC0]<<https://facebook.us14.list-manage.com/track/click?u=0433bbeb926ceaa614dbe98b0&id=48924a567e&e=b246cc62eb>>

Thematic Area 2 SATSURVEILLANCE:
Copernicus Security

The expected outcome under SATSURVEILLANCE is to provide two (2) downstream feature services:

1. Unusual/Irregular activity monitoring around a Critical Infrastructure.
2. Enhanced Change Detection.

[cid:image004.jpg@01D3AA5C.E9975AC0]<<https://facebook.us14.list-manage.com/track/click?u=0433bbeb926ceaa614dbe98b0&id=2ea5b93477&e=b246cc62eb>>

Tender Calendar

[cid:image005.jpg@01D3AA5C.E9975AC0]

This Tender has three Phases:

Phase 1: Solution Design

Phase 2: Prototype

Phase 3: Original development & validation and testing of a limited set of first products or services.

Deadline to submit a proposal: 9th April 2018, 23:59 CET

The process of applying

All following Tender documents can be found & downloaded at the Marine-E0 Procurement Area

<https://marine-eo.eu/call-tender><<https://facebook.us14.list-manage.com/track/click?u=0433bbeb926ceaa614dbe98b0&id=0a7dcfffd6&e=b246cc62eb>> .

1. Contract Notice

2. TD1 Request for Tender (General Information about the process & participation) 3. TD2 PCP Challenge (Services requirements description) 4. TD3 Tender Forms 5. TD4 Framework Agreement 6. TD5 Specific contract Phase 1 7. TD6 ANNEX (How to complete the form and annexes) 8. TD6 Annex H - Traceability Matrix 9. TD6 Annex I - Financial Offer and Cost breakdown

Proposals must be submitted in: <https://www.dgpm.mm.gov.pt/marine-eo><<https://facebook.us14.list-manage.com/track/click?u=0433bbeb926ceaa614dbe98b0&id=aac1d6bd40&e=b246cc62eb>>

Proposals' language: English.

Participation in the tendering procedure is open on equal terms to all types of operators from any country, regardless of their geographic location, size or governance structure.

Proposals may be submitted by a single entity or in collaboration with others. The latter can involve either submitting a joint tender or subcontracting, or a combination of the two approaches.

For phases 2 and 3, participation is limited to Tenderers that successfully completed the preceding phase.

To help you understand the requirements of the feature services there are two animated videos each for every thematic area (1 & 2). Click to view!
