Dear colleagues,

My colleague professor David Lackland Sam is willing to coordinate a project for topic "[MIGRATION-01-2019](#): Understanding migration mobility patterns: elaborating mid and long-term migration scenarios" but he is still looking for partners to make a strong consortium. Concretely he is looking for a Sociologist, Political scientist, Economist, Anthropologist and Demographer/Statistician but also people who have expertise in in "social network analysis"; "scenarios" and "Projections". Aside from that, European collaborators working with migration issues and are based in Germany, France, the Netherlands and Spain are particularly welcome.

In attachment you can find his partner search profile in which he explains who he is and what his idea is for the project proposal. It would be great if you could spread this profile among your researchers. Thanks in advance !

Best regards,
