- **Univerza v Ljubljani je med 114 visokošolskimi ustanovami, ki bodo del prvih 17 mrež »evropskih univerz«**

Evropska komisija je objavila seznam visokošolskih ustanov iz vse Evrope, ki bodo del prvih sedemnajstih mrež »evropskih univerz«. Med 114 izbranimi ustanovami je tudi članica SBRA Univerza v Ljubljani, ki bo del mreže »Eutopia – European University Alliance«. Članic te zveze je šest- poleg Univerze v Ljubljani v vlogi vodje zveze še Univerza v Warwicku, Univerza Paris Seine, Vrije Universiteit Brussel (VUB), Univerza Pompeu Fabra iz Barcelone in Univerza v Göteborgu.

Mreže evropskih univerz bodo postale meduniverzitetni kampusi, med katerimi se bodo lahko študenti, doktorski kandidati, osebje in raziskovalci nemoteno premikali. Združile bodo svoje strokovno znanje, platforme in vire ter izvajale skupne kurikule ali module na različnih področjih. Ti kurikuli bodo zelo prilagodljivi in bodo študentom omogočali, da prilagodijo svoje izobraževanje ter izberejo, kaj, kje in kdaj bodo študirali. Tako bodo pridobili evropsko diplomo.

Za vseh 17 mrež »evropskih univerz« je na voljo do 85 milijonov evrov. Posamezna zveza je na podlagi razpisa za program »Evropske univerze« v okviru programa Erasmus+ za začetek implementacije svojih načrtov v prihodnjih treh letih prejela do 5 milijonov evrov. Objavo drugega razpisa je Evropska komisija napovedala v jeseni.

➤ **Organizacije lahko začnejo testirati, kako v praksi deluje seznam za ocenjevanje zanesljivosti umetne inteligence**

Potem ko je strokovna skupina za umetno inteligenco objavila priporočila, organizacije lahko začnejo testirati, kako v praksi deluje seznam za ocenjevanje zanesljivosti umetne inteligence, ki ga je oblikovala skupina 52 neodvisnih strokovnjakov. Od aprila, ko je strokovna skupina objavila etične smernice, je interes za izvedbo testa že izrazilo več kot 300 organizacij. Na voljo je tudi spletni vprašalnik, prek katerega je mogoče do 1. decembra 2019 sporočiti ugotovitve testiranja.

Člani strokovne skupine bodo z izbranimi organizacijami iz javnega in zasebnega sektorja izvedli tudi pogovore z namenom, da bi bolje razumeli posledice implementacije ocenjevalnega seznama v različnih sektorjih.

➤ **Poročilo s priporočili za preobrazbo evropske industrije do leta 2030**

Neodvisna strokovna skupina je Evropski komisiji predstavila končno poročilo o prihodnosti evropske industrije. Skupina priporoča, da evropska industrija gradi svoj uspeh na prebojnih inovacijah, soočanju s podnebnimi spremembami ter osredotočanjem na ljudi in vrednote, s katerimi daje Evropa zgled preostalemu svetu. Prav tako priporoča ukrepe za uveljavljanje inovacij in tehnologije, prehod na podnebno nevtralno industrijo, krepitev globalne konkurenčnosti ter osredotočanje na znanje.

Strokovna skupina za vsakega od trendov na področju industrije do leta 2030 navaja, kateri so izzivi in katere priložnosti za Evropo. Hkrati je za uspešno preobrazbo evropske industrije potrebno sodelovanje petih med seboj odvisnih področij, ki morajo biti gonilo za uveljavitev prihodnjega industrijskega modela Evrope.

➤ **Slovenija je po kazalniku inovacijske uspešnosti nazadovala iz skupine močnih inovatorok v skupino zmernih inovatorok**

Slovenija je na področju inovacijske uspešnosti v letu 2018 padla iz skupine držav, ki so močne inovatorke, v skupino držav, ki so zmerne inovatorke. Evropska komisija v letošnjem poročilu o inovacijski uspešnosti držav članic ugotavlja, da sta Slovenija in Romunija zabeležili največji padec inovacijske uspešnosti med vsemi državami članicami. Evropska komisija je objavila dve poročili, ki sta Evropski sistem inovacijskih kazalnikov in Regionalni sistem inovacijskih kazalnikov za leto 2019. Ti podatki dopolnjujejo nedavna priporočila državam članicam za povečanje rasti produktivnosti in konkurenčnosti.

Za Slovenijo Evropska komisija navaja, da je padec inovacijske uspešnosti v letu 2018 posledica poslabšanja stanja pri številu novih doktoratov in kazalnikih o uporabi podatkov iz Centralnega informacijskega sistema (CIS). Najboljše rezultate ima Slovenija na področju naložb podjetij, človeških virov in povezovanja. Visoke vrednosti kazalnikov ima tudi na področju mednarodnih znanstvenih soobjav, pri podjetjih, ki zaposlenim ponujajo izobraževanje na področju informatike, in številu prijavljenih blagovnih znamk. Najšibkejša je Slovenija pri kazalnikih Financiranje in podpora raziskavam in razvoju, Učinki na prodajo in Inovatorji. Nizke vrednosti je analiza Evropske komisije pokazala tudi pri rabi tveganega kapitala, izvozu storitev, podprtih z znanjem in doktorskih študentih iz tujine.

Za statistično regijo Vzhodna Slovenija Evropska komisija navaja, da je zmerna inovatorica, njena inovacijska uspešnost se je med letoma 2011 in 2019 zmanjšala za 13,6 odstotka. Za Zahodno Slovenijo je analiza Evropske komisije pokazala, da je zmerna + inovatorica, njena uspešnost se je med letoma 2011 in 2019 zmanjšala za 15,2 odstotka.

➤ Na voljo je nova pobuda za podporo naložbam v digitalno gospodarstvo v Srednji, Vzhodni in Jugovzhodni Evropi

Za podporo naložbam v digitalno gospodarstvo v državah Srednje, Vzhodne in Jugovzhodne Evrope so Evropska komisija, Evropska investicijska banka (EIB) in Evropska banka za obnovo in razvoj (EBRD) zagnale pobudo za povečanje digitalnih naložb (Digital Innovation and Scale-up Initiative - DISC). To je prvi regionalni instrument na področju digitalnih inovacij in za podporo zagonskim podjetjem s področja digitalnega gospodarstva. Člani lahko dobijo podrobnejše informacije na SBRA.

Finančna orodja, ki bodo na voljo v okviru te pobude, bodo prilagojena tako začetni fazi kot tudi naslednjim fazam razvoja zagonskih podjetij, ko je financiranje bolj tvegano, zaradi tega tradicionalne finančne institucije ne zagotavljajo dovolj virov. Pobuda vključuje tudi program za tehnično pomoč s ciljem okrepiti zmogljivosti javnih agencij za implementacijo programov s področja digitalnih inovacij.

Namen pobude je tudi okrepiti naložbe v okolje, da bo prijazno za inovacije in podjetništvo s poudarkom na projektih za vzpostavitev čezmejne digitalne infrastrukture in zagotavljanje digitalnih znanj. Zdaj 46 odstotkov zagonskih podjetij v Srednji, Vzhodni in Jugovzhodni Evropi pridobiva finančne vire od vlagateljev zunaj Evrope, zato se pogosto selijo v ZDA in na Kitajsko. Pobuda DISC naj bi pripomogla, da bodo ostala v Evropi.
