

UČNI NAČRT PREDMETA/COURSE SYLLABUS

Predmet:	Okoljska geologija
Course title:	Environmental Geology

Študijski programi in stopnja	Študijska smer	Letnik	Semestri
Geologija, prva stopnja, univerzitetni	Ni členitve (študijski program)	3. letnik	Zimski

Univerzitetna koda predmeta/University course code:

11245

Predavanja	Seminar	Vaje	Klinične vaje	Druge oblike študija	Samostojno delo	ECTS
60	0	0	0	15	75	5

Nosilec predmeta/Lecturer:

Nastja Rogan Šmuc, Nina Zupančič

Vrsta predmeta/Course type:

Obvezni / Compulsory

Jeziki/Languages:	Predavanja/Lectures:	Angleščina, Slovenščina
	Vaje/Tutorial:	Angleščina, Slovenščina

Pogoji za vključitev v delo oz. za opravljanje študijskih obveznosti:

Prerequisites:

Pogoj za vključitev v delo je vpis v 3. letnik študija geologije.	Condition for inclusion in the work is inscription to a 3rd academic year.
---	--

Vsebina:

Content (Syllabus outline):

Temelji okoljske geologije	Foundations of Environmental Geology
Filozofija in osnovni koncepti	Philosophy and fundamental concepts
Ekologija in geologija	Ecology and Geology
Kroženje izbranih prvin in spojin v naravi	Selected elements and compound natural cycles
Procesi na Zemlji, ki predstavljajo nevarnost	Hazardous Earth Processes
Uvod v naravne nesreče	Introduction to Natural Hazards
Obalna erozija	Coastal Hazards
Vremensko pogojene nevarnosti	Weather induced Hazards
Padci zunajzemeljskih objektov	Impact of Extraterrestrial Objects
Naravni viri in onesnaženje	Natural resources and Pollution
Tla in okolje	Soils and Environment
Mineralni viri in okolje	Mineral Resources and Environment
Geokemično kartiranje	Geochemical Mapping
Metode ocenjevanja onesnaženja	Methods of estimateing pollution
Remediacija	Remediation
Uvod v geomedicino	Introduction to Geomedicine
Fosilna goriva in okolje	Fossil Energy resources and Environment
Alternativni energijski viri	Alternative Energy resources
Jedrska energija	Nuklear energy
Ravnanje z odpadki in njihova ponovna uporaba	Waste management and reuse
Organska onesnaževala	Organic pollutants
Globalne klimatske spremembe	Global climate change

	Environmental legislation Actual environmental issues
--	--

Temeljna literatura in viri/Readings:

- KELLER E. A., 2011, Environmental Geology. PearsonPrentice Hall, 596 pp.
- MONTGOMERY, C. W., 2006: Environmental Geology. McGraw&Hill, 540 pp.
- VAUGHAN, D.J. & WOGELIUS, R.A., 2000. Environmental Mineralogy, European Mineralogical Union, 434pp.
- VAUGHAN, D.J., 2006. Sulfide Mineralogy and Geochemistry (Ed.). Reviews in Mineralogy and Geochemistry, Geochemical Society and Mineralogical Society of America, 714pp.

Cilji in kompetence:

CILJI: Slušatelj obvlada osnovne probleme ter zakonodajo v zvezi z ranljivostjo in varovanjem okolja ter vpetost različnih vej geologije (mineralogija, geokemija, inženirska geologija, hidrogeologija) pri varovanju in sanaciji okolja.
KOMPETENCE: Študent je sposoben spoznati in predvideti okoljske vplive ter predlagati njihovo sanacijo. Zna se povezovati s strokovnjaki drugih strok pri presoji in reševanju okoljskih problemov.

Objectives and competences:

OBJECTIVES: Students manage the basic problems and legislation relating to vulnerability and protecting the environment as well as integration of different branches of geology (mineralogy, geochemistry, engineering geology, hydrogeology) in the protection and rehabilitation of the environment.
COMPETENCES: The student is able to recognize and anticipate environmental impacts and propose their rehabilitation. Knows how to liaise with experts in other fields of expertise in environmental issues.

Predvideni študijski rezultati:

Študent razume in prepozna okoljsko problematiko v širšem družbenem in naravoslovnem kontekstu. Pozna zakonske osnove varovanja okolja. Pozna dejavnike geohazarda in razume procese onesnaževanja ter posegov v okolje. Slušatelj je sposoben predstaviti vlogo geološkega znanja pri reševanju okoljske problematike ter poiskati ustrezne rešitve za preprečevanje in remediacijo škodljivih vplivov na okolje. Iz različnih vej geologije je sposoben izluščiti potrebna znanja za razumevanje in reševanje okoljske problematike ter predvideti škodljive posege v okolje ter predlagati njihovo sanacijo z vidika geološke stroke. Pri delu je sposoben sodelovati s strokovnjaki iz ostalih področij (gradbeniki, biologi, kemiki...), uporabljati domačo in tujo strokovno literaturo.

Intended learning outcomes:

The student understands and recognizes environmental issues in a broader social and natural science context. Knows the legal basics of environmental protection. Knows the geohazard factors and understands the processes of pollution and environmental interventions. The student is able to present the role of geological knowledge in solving environmental problems and to find appropriate solutions for the prevention and remediation of harmful effects on the environment. He is able to use the necessary knowledge from various branches of geology to understand and solve environmental problems, to anticipate harmful interventions in the environment and to propose their remediation from the perspective of the geological profession. He is able to work with experts in other fields (builders, biologists, chemists, etc.), use domestic and foreign professional literature.

Metode poučevanja in učenja:

Predavanja in dva dni obiska terena. V okviru predavanj študentje izdelajo eno seminarsko nalogu, ki jo javno predstavijo.

Learning and teaching methods:

Lectures and two days of field visits. Within the lectures students will prepare and present a seminar work.

Načini ocenjevanja:

Delež/Weight

Assessment:

Pisni izpit ali oddane domače naloge	90,00 %	Written exam or given homework
Predstavitev seminarske naloge	5,00 %	Presentation of seminar
Aktivno sodelovanje pri predavanjih	5,00 %	Active participation in lectures
