

UČNI NAČRT PREDMETA/COURSE SYLLABUS

Predmet:	Petrogeokemija
Course title:	Petrogeochemistry

Študijski programi in stopnja	Študijska smer	Letnik	Semestri
Geologija, prva stopnja, univerzitetni	Ni členitve (študijski program)	2. letnik	

Univerzitetna koda predmeta/University course code:	11290
---	-------

Predavanja	Seminar	Vaje	Klinične vaje	Druge oblike študija	Samostojno delo	ECTS
30	15	30	0	15	90	6

Nosilec predmeta/Lecturer:	Matej Dolenc, Mirijam Vrabec, Nastja Rogan Šmuc
----------------------------	---

Vrsta predmeta/Course type:	Izbirni / Elective
-----------------------------	--------------------

Jeziki/Languages:	Predavanja/Lectures:	Angleščina, Slovenščina
	Vaje/Tutorial:	Angleščina, Slovenščina

Pogoji za vključitev v delo oz. za opravljanje študijskih obveznosti:	Prerequisites:
Pogoji za vključitev v delo je vpis v 2. ali 3. letnik študija geologije. Priporočljivo - opravljeni izpiti iz Mineralogije, Petrologije magmatskih in metamorfnih kamnin, Sedimentne petrologije in Geokemije za pristop k izpitu.	Condition for inclusion in the work is inscription to the 2nd or 3rd academic year. Recommended - passed exams from Mineralogy, Igneous and metamorphic petrology, Sedimentary petrology and Geochemistry to take an exam.

Vsebina:	Content (Syllabus outline):
<p>Spolno: sestava Zemeljskega pllača in skorje, povprečna sestava kontinentalne skorje, globalna razporeditev elementov, procesi koncentriranja elementov</p> <p>Poglobljena geokemija magmatskih kamnin: ORB, OIB in alkalne serije, kontinentalni poplavni bazalți, orogeni andeziti</p> <p>Posebni kemični različki: redke zemelje, karbonatiti, natrijevi in kalijevi graniti, lamprofirji, riolitni trahiti in fonoliti, arhajski metabazalți in metaandeziti, izotopi</p> <p>Poglobljena geokemija metamorfnih kamnin</p> <p>Poglobljene geokemične lastnosti sedimentov in sedimentnih kamnin</p> <p>Zunajzemeljska geokemija: Lunarni bazalți in anortoziti, Mars in Venera, Tektiti, Drugi meteoriti</p>	<p>General: Composition of the Earth's Mantle and Crust, The Average Composition of the Earth's Continental Crust, Global Element Distribution, Element Concentration Processes</p> <p>Advanced Geochemistry of Igneous Rocks: Oceanic Ridge Basalts (ORBs), Oceanic Island Basalts (OIBs) & Alkaline Series, Continental Flood Basalts, Orogenic Andesites</p> <p>Special Chemical Types: Rare Earths, Carbonatites, Sodic and Potassic Granites, Lamprophyres, Rhyolites Trachytes and Phonolites, Archaean MetaBasalts and MetaAndesites, Isotopes</p> <p>Advanced Geochemistry of Metamorphic Rocks</p> <p>Advanced Geochemical characteristics of Sediments and Sedimentary Rocks</p> <p>Extraterrestrial geochemistry: Lunar Basalts and Anorthosites, Mars and Venus, Tektites, Other Meteorites</p>

Temeljna literatura in viri/Readings:
CARLSON, R. W. (Ed.), 2005: Treatise on geochemistry: The mantle and core, Elsevier, 586 p.
LENTZ, D. R. (Ed.), 2003: Geochemistry of sediments and sedimentary rocks: evolutionary considerations to mineral deposit-forming environments, Geological Association of Canada, 184 p.
RUDNICK, R. L. (Ed.), 2005: Treatise on geochemistry: The crust, Elsevier, 683 p.

Cilji in kompetence:

CILJI: Slušatelj pridobi razširjeno znanje o geokemičnih značilnostih magmatskih, metamorfnih, sedimentnih in zunajzemeljskih kamnin.

KOMPETENCE: Slušatelj je sposoben opisati, analizirati in razumeti geokemične značilnosti večine Zemeljskih in lunarnih kamnin. Seznanjen je z njihovo regionalno razporeditvijo, klasifikacijo in primeri njihovih geokemičnih trendov.

Objectives and competences:

OBJECTIVES: Students acquire advanced knowledge of geochemical characteristics of igneous, metamorphic, sedimentary, and extraterrestrial rocks.

COMPETENCES: The student is able to describe, analyse and understand geochemical characteristics of most types of terrestrial and lunar rocks. He is familiar with their regional distribution, classification, and examples of their geochemical trends and "geochemical fingerprints".

Predvideni študijski rezultati:

Študent razume in prepozna geokemične značilnosti Zemeljskih in izvenzemeljskih kamnin. Pozna geokemične karakteristike posameznih tipov kamnin in njihovo razprostranjenost v globalnem smislu. Sposoben je pridobiti in analizirati geokemične podatke ter interpretirati geokemične značilnosti in trende.

Intended learning outcomes:

The student understands and recognizes the geochemical characteristics of terrestrial and extraterrestrial rocks. He is familiar with geochemical characteristics of individual rock types and their distribution in a global context. He is able to obtain and analyze data and interpret geochemical characteristics and trends.

Metode poučevanja in učenja:

Predavanja, seminar, vaje in 2 dni terenskega dela. Študenti izdelajo terensko poročilo in seminarsko nalogu na dogovorjeno temo.

Learning and teaching methods:

Lectures, seminar, lab work and 2 days of fieldwork. Students will prepare a fieldwork report and seminar work on an agreed topic.

Načini ocenjevanja:

	Delež/Weight	Assessment:
Pisni izpit in/ali oddane domače naloge	60,00 %	Written exam and/or given homework
Seminarska naloga	25,00 %	Seminar work
Poročilo terenskega dela	10,00 %	Fieldwork report
Aktivno sodelovanje pri predavanjih	5,00 %	Active participation in lectures
