

UČNI NAČRT PREDMETA/COURSE SYLLABUS

Predmet:	Mineralogija glin
Course title:	Clay Mineralogy

Študijski programi in stopnja	Študijska smer	Letnik	Semestri
Geologija, druga stopnja, magistrski	Geookolje in geomateriali (modul)	1. letnik, 2. letnik	Zimski

Univerzitetna koda predmeta/University course code:

734

Predavanja	Seminar	Vaje	Klinične vaje	Druge oblike študija	Samostojno delo	ECTS
45	0	30	0	0	75	5

Nosilec predmeta/Lecturer:

Matej Dolenc

Vrsta predmeta/Course type:

Izbirni / Elective

Jeziki/Languages:	Predavanja/Lectures:	Angleščina, Slovenščina
	Vaje/Tutorial:	Angleščina, Slovenščina

Pogoji za vključitev v delo oz. za opravljanje študijskih obveznosti:

Prerequisites:

Zaključen dodiplomski študij, osnovna računalniška pismenost.	Completed undergraduate study, basic computer literacy.
---	---

Vsebina:

Struktura, nomenklatura in nastanek glinenih mineralov
Tehnike priprave vzorcev za določanje glinenih mineralov
Določanje glinenih mineralov (kaolinit, illit, smektit, vermiliklit, klorit) in z njimi povezanih mineralov (silikati, karbonati, Fe oksidi in hidroksidi, sulfidi in soli)
Prepoznavanje glinenih mineralov z zmesno strukturo
Kvalitativne in kvantitativne analize
Uporabnost glinenih mineralov
Vpliv na zdravje človeka

Content (Syllabus outline):

Structure, nomenclature, and occurrences of clay minerals
Sample preparation techniques for clay minerals
Identification of clay minerals (kaolinite, illite, montmorillonite, vermiculite, chlorite) and associated minerals (silica minerals, carbonates, Fe-oxydes/hydroxides, sulphides, salts)
Basic identification of mix-layered clay minerals
Qualitative and quantitative analysis
Clay minerals applications
Clays and human health

Temeljna literatura in viri/Readings:

- BERGAYA, F., THENG, B.K.G., LAGALY, G. 2006: Handbook of clay science. Elsevier, Amsterdam, 1223 p.p.
- MURRAY, H.H., 2007: Applied clay mineralogy. Elsevier, Amsterdam, 180 p.p.
- PARKER, A., Rae, J.E., 1998: Environmental interaction of clays. Springer, Berlin, 271 p.p.
- DUANE, M.M., C. ROBERT, and Jr. REYNOLDS, 1997: X-ray Diffraction and the Identification and Analysis of Clay Minerals. Oxford University Press, New York, 378 p.p.

Cilji in kompetence:

CILJI: Študent pridobi znanje o strukturah glinenih mineralov, Študent se spozna z osnovami kvalitativnega in kvantitativnega določanja tipov glinenih mineralov v naravnih materialih, poznavanje njihovega nastanka,

Objectives and competences:

OBJECTIVES: Student acquires knowledge of clay minerals structure. Student gets familiar with: principles of qualitative and quantitative determination of different types of clay minerals in geomaterials,

<p>pojavljanja in primernosti uporabe ter vpliva na okolje.</p> <p>KOMPETENCE: Študenti znajo:</p> <ul style="list-style-type: none"> - prepozнатi glinene minerale z uporabo rentgenske preškovne difrakcije (z uporabo HighScore+ programa) - določiti mineralno sestavo glin - razumeti pomembnost lastnosti glinenih mineralov in glin - določiti potrebne postopke predpriprave vzorcev za določanje mineralov glin. 	<p>occurrences and applications of clay minerals and their impact on the environment.</p> <p>COMPETENCES: Students are able to:</p> <ul style="list-style-type: none"> - identify clay minerals using XRD technique (using HighScore+ software) - determine the mineralogical composition of clays - understand the environmental significant properties of clay and clay minerals - determine required sample preparation techniques for clay minerals.
--	---

Predvideni študijski rezultati:	Intended learning outcomes:
<p>Študent pozna strukturo glinenih mineralov, razume njen povezanost z uporabnimi lastnostmi glinenih mineralov in zna kvalitativno in kvantitativno določiti glinene minerale in primernost njihove uporabe. Pri ugotovljeni prisotnosti glinenih mineralov v naravnih materialih pozna in razume njihov vpliv v okolju.</p>	<p>Students gets familiar with clay minerals structures, understand its relationship with the clay minerals properties and are able to qualitatively and quantitatively identify and determine appropriate use of clay minerals. Acquires knowledge about clay minerals impact on the environment.</p>

Metode poučevanja in učenja:	Learning and teaching methods:
<p>Predavanja, seminarske vaje (30) v laboratoriju in računalniški učilnici, samostojno reševanje problema v obliki seminarne naloge.</p>	<p>Lectures, laboratory work and work with computers, independent resolving of the problem in the form of the seminar work.</p>

Načini ocenjevanja:	Delež/Weight	Assessment:
teoretična vprašanja	40,00 %	theory
reševanje treh različnih difraktogramov	40,00 %	identification of three diffractograms
seminarska naloga	20,00 %	seminar work
Ocenjevalna lestvica: 51-60% (6); 61-70% (7); 71-80% (8); 81-90% (9); 91-100% (10) ob upoštevanju Statuta UL in fakultetnih pravil.		Grading scale: 51-60% (6); 61-70% (7); 71-80% (8); 81-90% (9); 91-100% (10) UL and faculty rules.
