

UČNI NAČRT PREDMETA/COURSE SYLLABUS

| | |
|----------------------|------------------------------------|
| Predmet: | Kvantitativna strukturna geologija |
| Course title: | Quantitative Structural Geology |

| Študijski programi in stopnja | Študijska smer | Letnik | Semestri |
|--------------------------------------|--|----------------------|----------|
| Geologija, druga stopnja, magistrski | Regionalna geologija in paleontologija (modul) | 1. letnik, 2. letnik | Zimski |

Univerzitetna koda predmeta/University course code:

749

| Predavanja | Seminar | Vaje | Klinične vaje | Druge oblike študija | Samostojno delo | ECTS |
|------------|---------|------|---------------|----------------------|-----------------|------|
| 30 | 15 | 30 | 0 | 0 | 75 | 5 |

Nosilec predmeta/Lecturer:

Marko Vrabec

Vrsta predmeta/Course type:

Izbirni / Elective

| | | |
|--------------------------|----------------------|-------------------------|
| Jeziki/Languages: | Predavanja/Lectures: | Angleščina, Slovenščina |
| | Vaje/Tutorial: | Angleščina, Slovenščina |

Pogoji za vključitev v delo oz. za opravljanje študijskih obveznosti:

Prerequisites:

| | |
|---|--|
| Solidno znanje strukturne geologije (na nivoju dodiplomskega študija), poznavanje osnov geomehanike, poznavanje osnovnih geometrijskih tehnik analize geoloških kart. | Solid BSc-level knowledge of Structural Geology, knowledge of basic Geomechanics, and familiarity with basic geological-map analysis techniques. |
|---|--|

Vsebina:

Content (Syllabus outline):

| | |
|--|---|
| <ul style="list-style-type: none"> - tehnike in orodja za strukturno kartiranje - geometrijski opis struktturnih elementov z metodami diferencialne geometrije - osnove mehanike kontinuov - mehanika elastičnih, lomnih in viskoznih deformacij - tehnike paleonapetostne analize - tehnike računalniško podprtega uravnotežanja profilov s programsко opremo MVE Move 2D in Move 3D - geomehansko modeliranje lomnih deformacij v kamninskem mediju s programsко opremo MVE Move - modeliranje distribucije in orientacije razpok v kamninskem mediju - rekonstrukcija deformacij z mehanskim modeliranjem z metodo končnih elementov s programsко MVE Move | <ul style="list-style-type: none"> - techniques and tools for structural mapping - geometrical description of structural elements with differential geometry - fundamentals of mechanics of continua - mechanics of elastic, brittle and viscous deformation - techniques of paleostress analysis - techniques of kinematic section balancing using MVE Move 2D and Move 3D software - geomechanical modeling of brittle deformation in rocks with MVE Move software - modeling spatial distribution and orientation of fractures in rocks - reconstructing deformation with mechanical modeling using MVE Move software |
|--|---|

Temeljna literatura in viri/Readings:

TWISS R.J., MOORES E.M.: Structural Geology (2. izdaja). W. H. Freeman, 2006, 532 str.

POLLARD D.D., FLETCHER R.C.: Fundamentals of Structural Geology. Cambridge University Press, 2005, 512 str.

Cilji in kompetence:

Objectives and competences:

| | |
|--|---|
| CILJI: Po opravljenem predmetu bodo študenti sposobni napraviti kvantitativno strukturno analizo lomnih in | OBJECTIVES: At the end of the course, students will be able to perform |
|--|---|

| | |
|--|--|
| <p>duktilnih struktur v merilu izdanka in v regionalnem merilu.</p> <p>KOMPETENCE:</p> <ul style="list-style-type: none"> - Obvladovanje postopkov strukturnih meritev - Osnovno znanje dela s programskim paketom MVE Move | <p>quantitative structural analysis of brittle and ductile deformational features at the outcrop and map scale.</p> <p>COMPETENCES:</p> <ul style="list-style-type: none"> - Mastering the techniques of structural measurements - Fundamental knowledge of MVE Move software suite |
|--|--|

| | |
|--|---|
| <p>Predvideni študijski rezultati:</p> <ul style="list-style-type: none"> - Razumevanje osnovnih konceptov mehanike kontinuov. - Sposobnost napraviti osnovno kvantifikacijo tektonskih procesov. | <p>Intended learning outcomes:</p> <ul style="list-style-type: none"> - Understanding the basic concepts of continuum mechanics. - Ability to perform basic quantification of tectonic processes |
|--|---|

| | |
|--|--|
| <p>Metode poučevanja in učenja:</p> <p>Predavanja, kabinetne vaje in vaje v računalniški učilnici. Seminarsko delo študentov.</p> | <p>Learning and teaching methods:</p> <p>Lectures, lab sessions, computer lab sessions. Seminar work.</p> |
|--|--|

| Načini ocenjevanja: | Delež/Weight | Assessment: |
|---|---------------------|--|
| Pisni izpit | 60,00 % | Written examination |
| Seminar | 40,00 % | Seminar |
| Ocenjevalna lestvica: 51-60% (6); 61-70% (7); 71-80% (8); 81-90% (9); 91-100% (10) ob upoštevanju Statuta UL in fakultetnih pravil. | | Grading: 51-60% (6); 61-70% (7); 71-80% (8); 81-90% (9); 91-100% (10)), according to University Statute and Faculty Acts. |
