Metode poučevanja in učenja:

Predavanja
Pisanje na tablo
PowerPoint predstavitev
Prikazovanje kemijskih eksperimentov

Learning and teaching methods:

Oral lectures
Writing on the blackboard
Power-Point presentation
Demonstration of chemical experiments

Načini ocenjevanja:

	Delež/Weight	Assessment:
vaje	30,00 %	exercises (coursework)
pisni izpit	70,00 %	written exam
Pozitiven kolokvij (računske naloge) so pogoj za pristop k izpitu. Pisni izpit je kombinacija vprašanj opisnega in izbirnega tipa. Dodatno študentom med predavanji ponudim tudi t.i. bonusne točke, ki se prištejejo k točkam, doseženim na pisnem izpitu. Bonusne točke lahko pridobijo s seminarimi nalogami (do 10%) ali pa z aktivnim sodelovanjem na predavanjih in pravilnimi odgovori oz. izračuni (do 6%). Seminar ni obvezen. Končna ocena predmeta je kombinacija ocene vaj in pisnega izpita.	The precondition to enter the exam is a positive mark of written test (stoichiometry). Written exam is combination of multiple choice and essay questions. Additional points are offered to the students for seminars (up to 10 points) or/and for active participation and correct answers or calculations during the lectures (up to 6 points). The seminar is not obligatory. The final mark is combination of marks obtained for exercises and written exam.
