

UČNI NAČRT PREDMETA/COURSE SYLLABUS

Predmet:	Mikrofacies karbonatov in klastitov
Course title:	Microfacies of Carbonate and Clastic Sedimentary Rocks

Študijski programi in stopnja	Študijska smer	Letnik	Semestri
Geologija, prva stopnja, univerzitetni	Ni členitve (študijski program)	2. letnik	

Univerzitetna koda predmeta/University course code:	898
---	-----

Predavanja	Seminar	Vaje	Klinične vaje	Druge oblike študija	Samostojno delo	ECTS
15	30	30	0	15	90	6

Nosilec predmeta/Lecturer:	Boštjan Rožič, Mirijam Vrabec
----------------------------	-------------------------------

Vrsta predmeta/Course type:	Izbirni / Elective
-----------------------------	--------------------

Jeziki/Languages:	Predavanja/Lectures:	Angleščina, Slovenščina
	Vaje/Tutorial:	Angleščina, Slovenščina

Pogoji za vključitev v delo oz. za opravljanje študijskih obveznosti:	Prerequisites:
Pogoji za vključitev v delo je vpis v 2. ali 3. letnik študija geologije. Priporočljivo - opravljeni izpiti iz Mineralogije, Paleontologije in Sedimentne petrologije za pristop k izpitu.	Condition for inclusion in the work is inscription to the 2nd or 3rd academic year. Recommended - passed exams from Mineralogy, Paleontology and Sedimentary petrology to take an exam.

Vsebina:	Content (Syllabus outline):
Koncept mikrofaciesa	The microfacies Concept
Karbonatna sedimentacijska okolja	Carbonate Depositional Environments
Klastična sedimentacijska okolja	Clastic depositional Environments
Metode analize microfaciesa	Methods of Microfacies Analysis
Podatki in analiza microfase	Microfacies Data and Analysis
Diageneza in poroznost	Diagenesis and Porosity
Klasifikacije	Classifications
Karbonatne kamnine v zbruskih	Carbonate rocks in Thin Section
Klastične kamnine v zbruskih	Clastic Rocks in Thin Sections
Interpretacija microfaciesa	Microfacies Interpretation
Prepoznavanje paleookoljskih pogojev	Recognizing Paleoenvironmental Conditions
Prepoznavanje sedimentacijskih sistemov	Recognizing Depositional Settings

SCHOLLE, P.A., 1978: *A Color Illustrated Guide To Carbonate Rock Constituents, Textures, Cements, and Porosities*. The American Association of Petroleum Geologists, Memoir 27, U.S.A., 241 p.

SCHOLLE, P.A., 1979: *A Color Illustrated Guide To Constituents, Textures, Cements, and Porosities of sandstones and Associated Rocks*. The American Association of Petroleum Geologists, Memoir 28, U.S.A., 201 p.

Cilji in kompetence:

CILJI: Poglobljeno spoznavanje procesov nastanka, sestave, mikrostrukturnih in mikroteksturnih značilnostih klastičnih in karbonatnih sedimentnih kamnin.
Interpretacija in analiza mikrofacielnih podatkov, paleookolja in sedimentacijskih sistemov.
KOMPETENCE: Študent je usposobljen je za samostojno analizo mikrofacielnih značilnosti karbonatnih in klastičnih sedimentnih kamnin in njihovih tekstur ter interpretacijo sedimentacijskih, diagenetskih in paleookoljskih pogojev njihovega nastanka.

Objectives and competences:

OBJECTIVES: Advanced understanding of processes of formation, composition, microstructure and mikroteksture characteristics of clastic and carbonate sedimentary rocks. Interpretation and analysis of mikrofacies data, paleoenvironment and depositional systems.

COMPETENCES: Students are qualified for independent analysis of mikrofacies characteristics of carbonate and clastic sedimentary rocks and their textures and interpretation of sedimentary, diagenetic and paleoenvironmental conditions of their formation.

Predvideni študijski rezultati:

Študent osvoji in razume napredno sedimentološko terminologijo in metode proučevanja karbonatnih in klastičnih sedimentov in sedimentnih kamnin. Prepozna vse mikrofacielne značilnosti sedimentnih kamnin ter pogubi znanje makroskopske in mikroskopske analize za interpretacijo sedimentacijskih in postsedimentacijskih procesov.

Intended learning outcomes:

Students learn and understand advanced sedimentological terminology and methods for studying carbonate and clastic sediments and sedimentary rocks. Students are able to identify all microfacies characteristics of sedimentary rocks, and learn advanced macroscopic and microscopic analysis of sedimentary rocks necessary for the interpretation of sedimentary and postsedimentary processes.

Metode poučevanja in učenja:

Predavanja, projekt (sestavljen iz terenskega, laboratorijskega in kabinetnega dela), vaje v mikroskopirnici in predavalnici.

Learning and teaching methods:

Lectures, project (composed of field, laboratory and cabinet work), practical work in the microscope laboratory and classroom.

Načini ocenjevanja:

Delež/Weight Assessment:

Pisni izpit in/ali ustno preverjanje	50,00 %	Written exam and/or oral exam
Projekt	50,00 %	Project
