Selecting External Optional Courses

The entire university undergraduate study programme (UN) Materials Engineering includes optional courses worth 18 ECTS (or 10%). Broader (external) optional courses are worth 8 ECTS, while the remaining 10 ECTS are reserved for professional courses from the Optional Professional Courses – 3rd Year Table.

Mobility

Students have the possibility of transferring 30 ECTS (or one study semester) from another programme at another university or higher education establishment with which the UL has or will have an agreement on recognising the credit study system. The recognised 30 ECTS may either come from required courses or optional courses. The study programme at another university must cover the same fields as the Materials Engineering study programme. The recognition applications will be reviewed individually and according to the procedure set out in the Statute of the UL and the NTF Rules.
