Finishing collection 2014/2015, mentor prof. Elena Fajt

The collection embodies the shape, fierceness and spirit of an owl. In mythology owls were said to accompany a soul from the physical world into the realm of the spirit. I used this story as a symbolic representation of merging with the dreams that are within us and allowing them to manifest into the material world. The fantasy of the collection is that the garments are embedded with the spiritual powers of owls and can manifest dreams into reality.
