

## OBJECTIVES

### TO SUPPORT

the upskilling of the textile industry (students and companies) towards the green transition favouring the uptake of skills in sustainability, circular economy and eco-design.

### TO FOSTER

innovative training methodologies based on multidisciplinary hands-on activities.

### TO STRENGTHEN

knowledge, skills and competences using virtual learning methodologies and tools.

### TO PROMOTE

the uptake of good practices towards a more sustainable textile industry.

### TO STRENGTHEN

collaboration among universities, technological centres and the textile industry.

## OUTPUTS

CLEANTEX will develop four intellectual outputs and will organise one intensive training summer course to address the project objectives:

### DESIGNING AND DEVELOPING a virtual training program

with open educational resources about circular economy and eco-design with focus on the textile industry.

### DEVELOPING an Industrial clean textiles bootcamp training

with innovative materials and methodologies. Materials will also be used in the intensive training summer course. ✨ ✨ ✨

### CREATING an e-book with practical guides

including practical cases on how to apply life cycle assessment and eco-design in the advanced textile manufacturing industry.

### DEVELOPING a good practices handbook

including success stories implementing eco-design and circular economy in the textile industry. 👍

### ORGANISING an intensive training summer course

using the bootcamp methodologies with students from the 3 universities in CLEANTEX partnership. The summer course will be organized in 2022 in Ljubljana.

## PARTNERS

CLEANTEX partnership brings together 8 institutions from 6 European countries with complementary profiles and competencies. The partnership includes universities, training centres, technological centres and non-profit institutions.
