

CLEANTEX

ISSUE Number 05 JANUARY 2023

IN THIS ISSUE:

- Cleantex **Bootcamp is launched!**
- Current status of the project
- Cleantex **Final Meeting**
- Project **conclusion**

CLEANTEX BOOTCAMP IS LAUNCHED!

The Cleantex Bootcamp is a very valuable resource. It consists in both **theoretical and practical examples about** how to implement an **alternative and dynamic way of teaching**. The theoretical part is a proposal that focuses on some stages – and how develop, adapt and implement it – efficient and profitable course. It also provides with some suggestions and advices to the trainer.

The practical part is more oriented to the textile sector and sustainability topics within the industry.

It exposes the **learnings extracted from its implementation during the Cleantex Summer School** in Ljubljana in 2022 and the final version document has been elaborated including them.

At the end, **the Bootcamp and its instructions work as a guideline to implement a any kind of Summer School or intensive training.**

The Cleantex Bootcamp is now freely available in the Project's website. **Download** it [here](#).

CURRENT STATUS OF THE PROJECT

During last months, Cleantex project has get the final (recta) and all its targeted outputs have been elaborated and disseminated in the best possible way. Find below a brief recap of the work done:

An open **Virtual Training Program** about circular economy and eco-design with focus on the textile industry. **Check it out** [here](#).

The **IO3**, the **E-book**. **A compilation of good practices examples eco-design and sustainability of the textile industry.** **Download** it [here](#).

A **Training Bootcamp guide** with innovative teaching materials and methodologies focused on the textile sector. **Download** it [here](#).

The **IO4**, a **Training Summer Course** with students where the educational materials the partnership developed were tested. **Read** the report [here](#).

CLEANTEXT FINAL MEETING

Last 12th January 2023 the Cleantex consortium met physically, in their **6th and final meeting** to follow up the current advance of the project.

The event was held in Roubaix, France, and was hosted by **ENSAIT**.

During the meeting, several topics were discussed. The most relevant ones were the **final versions of the E-book, the Bootcamp** and the review of the Virtual Learning Platform. Also, some financial and management aspects as well as some project dissemination and quality guidelines. Now, the **consortium is focused on the conclusion** of some tasks.

After the meeting, partners had the chance to visit ENSAIT facilities and labs.

Cleantex partners during their meeting in Roubaix

PROJECT CONCLUSION

After more than two years of constant and rigorous work the **Cleantex partners have achieved successfully all the objectives once they set on themselves with the aim to leave the European textile industry a little bit greener than they found it.** During this time, the partners not just collaborated together but **helped each one when needed, agreed the whole direction of the project and created good connections that will work, for sure, to launch new innovative projects in the future.**

Despite its beginning was in the middle of the COVID-19 pandemics, **the consortium's resilience managed to go on with all the tasks and commitments** and it is proved not with the several outputs generated and exposed above, but for their quality and coherence.
